PROFESSIONAL SUMMARY

Software Engineer with experience building scalable FinTech and SaaS applications using Node.js, NestJS, Next.js, TypeScript, MySQL, and MongoDB. Skilled in developing REST APIs, real-time systems with Socket.IO, authentication, authorization, RBAC, and backend services using Redis and Docker in Agile environments.

PROFESSIONAL EXPERIENCE

Sapphire Consulting Solutions Pvt. Ltd.

Sep 2025 – Present

Full Stack Developer

Kolkata, India

- Engineered backend REST APIs for InvoRush, a FinTech SaaS platform enabling invoice discounting, invoice payments, bulk payments, and supply chain financing, supporting enterprise transactions valued up to 100 Cr.
- Designed and implemented a dynamic, permission-based RBAC system using Node.js, TypeScript, and MySQL, allowing admins to create custom roles with granular, service-level access control across financial workflows.
- Built and optimized database schemas with MySQL to support vendor management and payment automation, integrating PayU and HDFC payment gateways for transaction processing.
- Built a real-time notification system using Socket.IO and MongoDB, delivering live updates on transactions and workflow events across the platform.
- Integrated third-party supply chain financing partners, including Viffin and PSBExchange, extending platform capabilities for enterprise working capital management.

PROJECTS

Pulse Monitor

GitHub | Live

Next.js, TypeScript, Prisma ORM, PostgreSQL, Redis, BullMQ, Docker, Socket.IO, Tailwind CSS

- Built a queue-based uptime monitoring platform using BullMQ and Redis for scheduled background health checks, incident history tracking, and real-time notifications via Socket.IO.
- Designed a dashboard for availability analytics and performance metrics, integrating Cloudinary for media handling and Docker for containerized deployment.

RBAC Blog CMS

GitHub | Live

Next.js, TypeScript, PostgreSQL, Prisma ORM, Tailwind CSS

- Developed a role-based content management system with JWT authentication, protected REST APIs, and granular role management for admin and content workflows.
- Built a responsive admin dashboard with full CRUD operations using Next.js, Prisma ORM, and PostgreSQL.

Collaborative Real-Time Code Editor

GitHub | Live

React.js, Node.js, Socket.IO, JavaScript

- Developed a real-time collaborative code editor using React and Socket.IO, enabling multiple users to join a shared room and edit code simultaneously.
- Supported live code editing across multiple programming languages, including JavaScript, Java, C++, and Python, with real-time synchronization for all connected users.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, SQL, C, C#, Python (Basic)

Frontend: React, Next.js, HTML, CSS, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, NestJS, REST APIs, Socket.IO, Authentication, Authorization, RBAC

Databases: MySQL, MongoDB, PostgreSQL, Prisma ORM

Cloud & DevOps: Docker, Redis, BullMQ, AWS (Learning), Vercel, Render

Concepts: Low-Level Design (LLD), OOP, RESTful Architecture

Developer Tools: Git, GitHub, Postman, VS Code

CERTIFICATIONS

- The Complete 2024 Web Development Bootcamp (Udemy)
- Backend Development Course (Physics Wallah)
